*Parrots and
Cockatoos Honor*

Name (First and Last)

has completed the
requirements for the

Parrots and Cockatoos Honor

Date

Instructors Signature)

1. Name 15 species of parrot and five species of cockatoo that are common to Australia and be able to identify them from real life or pictures.

Parrots

Psephotus chryspterygius

Cacatua tenuirostris

Neophema chrysogaster

Eclectus roratus (male)

11. Make a list of all the parrots, cockatoos, and lorikeets that are found at the zoo and the area of the zoo they are located.

This image shows a blank sheet of white paper with vertical ruling lines. The lines are evenly spaced and run from the top to the bottom of the page. There are no margins or other markings on the paper.

8. What Australian cockatoo is regarded as the most beautiful in the world? Describe what it looks like and where it is found.

9. Name four different Lorikeets and define what makes them different from a parrot? What type of tongue do they have and why?

10. Be able to describe the nest of any one of the above parrots or cockatoos and also tell the color of the egg.

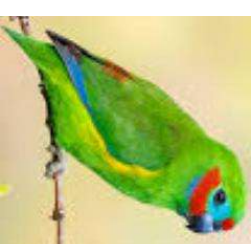

5. _____

Eclectus roratus (female)

6. _____

Alisterus scapularis

7. _____

Cyclopsitta diophthalma

8. _____

Psephotus haematonotus

9. _____

Neophema pulchella

10. _____

Barnardius zonarius

11. _____

Neophema petrophila

12. _____

Prosopaea tabuensis

5. Which is the largest species in the Rosella family? Where does it come from and what is its usual food?

6. Every State of Australia has a Rosella that is common to that State. Some are found in more than one State but there is one that is commonly associated with your State. Which is it?

7. When the Eclectus parrot was first found it was thought that the Male and Female were of different species. Why was this? Where are they found and what is their usual diet?

3. Where in Australia would you find each of the following and describe the natural diet of each.

a. Long Billed Corella Parrot

b. Great Palm Cockatoo

c. Gang Gang Cockatoo

4. Which three species of cockatoo are known as the most rare?

13. _____
Platycercus icterotis

14. _____
Platycercus elegans

15. _____
Platycercus venustus

16. _____
Purpureicephalus spurius

Cockatoos

1. _____
Probosciger aterrinus

2. _____
Callocephalon fimbriatum

3. _____
Cacatua alba

4. _____
Calyptorhynchus lathami

6

5. _____
Lophocroa leadbeateri

6. _____
Cacatua galerita

7. _____
Calyptorhynchus banksii

2. Name two species of parrot that builds its nest in a termite mound and tell where each is found.

7
