

Rainforest Honor

Name (First and Last)

has completed the
requirements for the
Rainforest Honor

Date

Instructors Signature)

1. Describe a rainforest.

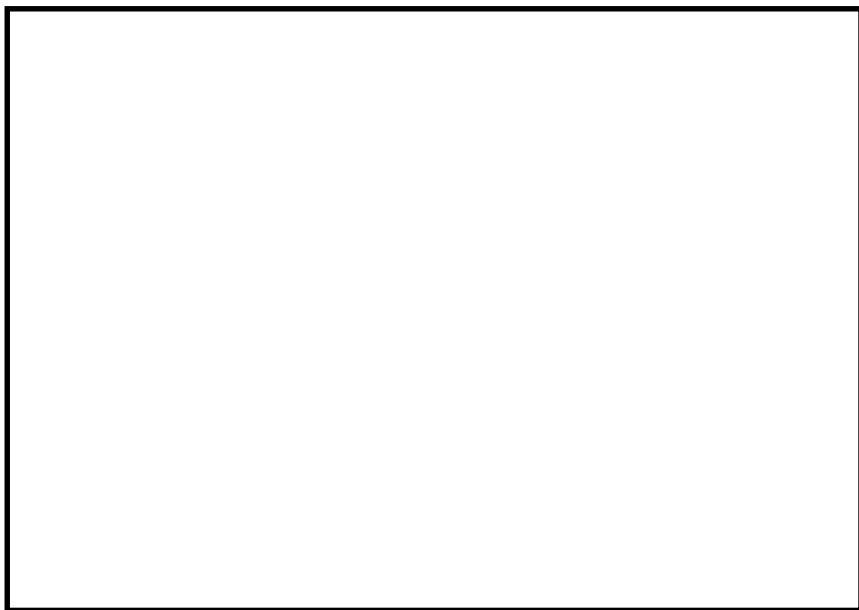

2. State the two main kinds of rainforests and describe how they are different. Diagram on a map the locations of these two main kinds of rainforests and identify these types.

3. Explain what causes so much rain to fall in rainforest biome areas.

4. Draw a diagram showing the vertical layers of plants in a tropical rainforest. Label them.

5. Describe or draw to show how rainforests regenerate (replace lost or injured living organisms).

6. Observe and identify five birds that live in the Lied Jungle tropical rainforest.

1. _____

2. _____

3. _____

4. _____

5. _____

7. Observe and identify ten animals that live in the Lied Jungle tropical rainforest.

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

8. List the predominant vegetation in rainforests.

9. What is an epiphyte? Be able to identify three plant examples from pictures.

1.

2.

3.

10. Learn about one invasive species that affects the rainforest.

11. What are some renewable resources that rainforests provide for humans?

12. List at least three ways that rainforests can be protected.

- 1.

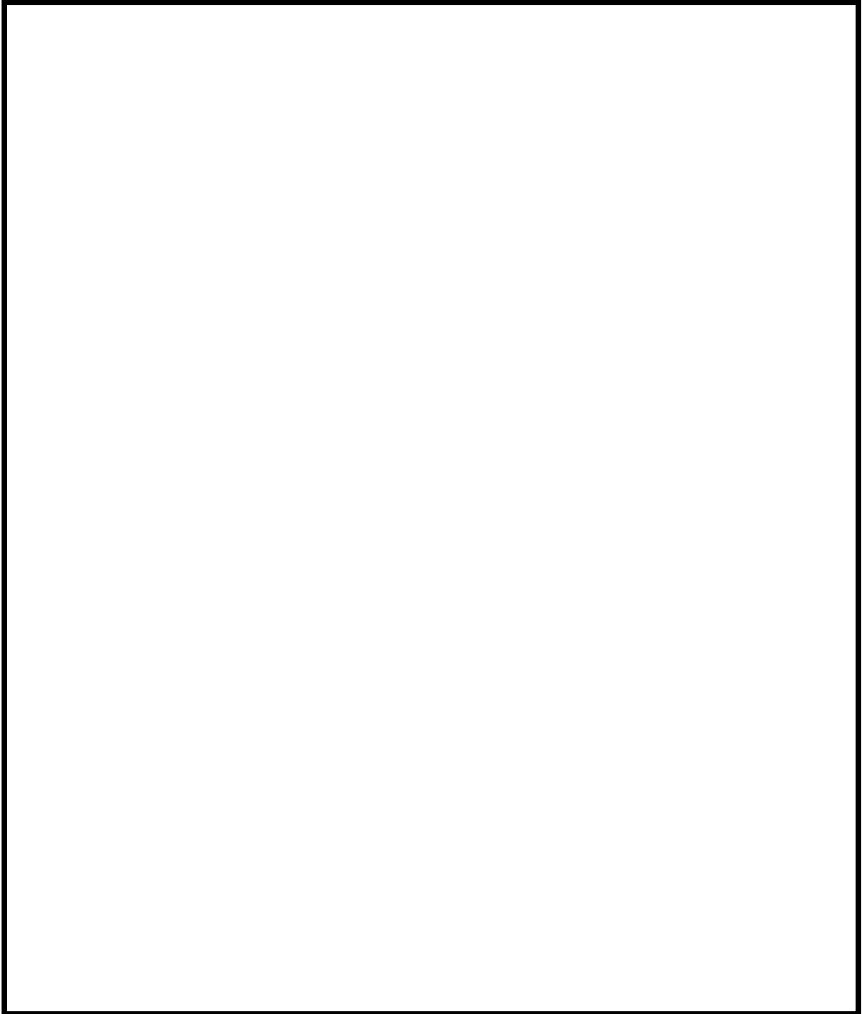

- 2.

- 3.

13. Share in your group one thing you learned about a plant, animal, or bird that lives in the rainforest. Write down what you shared.

14. Do the following activities:

- a. Visit the Lied Jungle at the Omaha zoo where there are animals typical of the rainforest biome.
- b. Discuss in your group why rainforest conservation is important and why rainforest should be saved.
- c. Draw a picture of something you had fun learning about while studying the rainforest today at the zoo.
