

Greetings Preschool Families!

Our class has successfully landed back on earth as we learned about space this week. Our art project was to use bubble wrap, paint, and glitter to create a moon, aluminum foil astronauts, and stars/comets for an outer space canvas. Math included counting backwards for blastoff and alien counting/identifying numbers. Each student created a rocket by recognizing letter placement of their name using the shapes square and triangle. Thursday we played space bingo and took a pretend trip to outer space using a battery operated star gazing machine in our bathroom with the lights off. This is always a class favorite as we buckle up for blast off, asteroids, and turbulence. Movement included a Danny Go Space Journey and Cosmic Kids Space Yoga. We have been so very busy practicing for our Spring Program this week but could also use some help at home with the speaking parts (jokes, poem, and Bible Verses).

Speaking of the Spring Program, please bring your child to the church and drop your child off at the same room as the Christmas Program on Tuesday, April 21 around 6:15. We hope everyone is able to come and support all the students! We promise to be entertaining! 😄

If you have any questions, concerns or suggestions, please feel free to reach out to me. I prefer to have open communication and to leave no unanswered questions regarding your child's educational needs. I feel this is so important for their growth as a parent for these little learners.

Have a wonderful weekend!

Ms. Trudy
